## ALi Corporation Introduces Latest Innovations and Enriched Portfolio at CommunicAsia 2019

Issued by : ALi Corporation

**Taipei – June 14<sup>th</sup>, 2019** – ALi Corporation, a leading Set-Top Box (STB) chipset provider, proudly announced that the company will attend CommunicAsia 2019 in Singapore from June 18<sup>th</sup> to June 20<sup>th</sup> at Marina Bay Sands. CommunicAsia has been Asia’s dynamic convention for information and communication technology, and this time ALi will introduce its latest technology as well as long expertise in STB (set-top box) SoC solutions.

At CommunicAsia 2019, ALi will showcase enriched product portfolio. Aside from hybrid solutions, Android/Linux real-time OS platforms, high DMIPS chipsets presented in our previous participation, this year ALi will feature its F8 SoC family, the CAS (conditional access system) pre-validated, value chipset to offer cost-effectiveness and high-performance for operators. In fact, the F8 solution has already been deployed by major Pay TV operators.

Besides the showcase of F8, ALi will also introduce next-generation satellite SoC named F6 family in the second half of 2019. As the next flagship chipset, F6 is compatible with various mainstream CAS requirements. To accelerate the time-to-market process for operators, F6 integrates rich security and ALi’s unified software SDK to shorten deployment efforts and offer cost-effectiveness.

“ALi has been known for its long-term dedication in home entertainment and multimedia, with its well-established STB solutions and R & D capability in expandable and scalable STB technologies,” said Sophia Liang, CEO of ALi Corporation. “To meet the rapid changes in the industry, ALi will not only reinforce its commitment in STB SoC development, but also extend our efforts in the enrichment of our product portfolio, including smart voice-controlled OTT, smart audio and even A.I. + IoT solutions to go beyond the existing home entertainment and multimedia paradigm. In fact, ALi will soon introduce smart audio SoC to the market”.

For further information of ALi recent achievements, please visit ALi booth at Marina Bay Sands, Singapore, Level 1, 1H2-07, June 18<sup>th</sup> to June 20<sup>th</sup>, at CommunicAsia 2019.

### About ALi Corporation

ALi Corporation is a leading innovator and developer in the set-top box (STB) system-on-chip (SoC) market. By fully leveraging its core expertise in the set-top box industry, ALi Corp.’s solutions are recognized for their high levels of integration, superior performance reliability, premier customer oriented service and compelling cost structure. Hundreds of Pay TV operators have adopted ALi Corp.’s solutions worldwide. ALi Corp. was founded in 1987 with headquarters in Taipei, Taiwan, R&D centers as well as sales offices in Hsinchu, Shenzhen, Zhuhai, Geneva, Seoul, and Noida, and technical support teams throughout Asia.
